PROFESSIONAL SUMMARY

Full-stack and backend software engineering student at UW-Madison (CS + Data Science + Mathematics) with production experience across two internships, spanning web platforms, backend infrastructure, and embedded systems. Proficient in React, Next.js, Node.js, and cloud infrastructure; experienced shipping features in CI/CD-driven production environments and collaborating on low-level AI accelerator tooling. Comfortable across the full stack and at home in fast-moving engineering teams.

EDUCATION

University of Wisconsin - Madison

B.S. in Computer Science, Data Science, and Mathematics.

Madison, WI

Expected May 2028

EXPERIENCE

Software Engineer Intern

Ambarella

Jun. 2026 – Present

Santa Clara, CA

- Extended Netron, a neural network visualizer, to support computation graph editing and ONNX file export
- Collaborate with two Ph.D. researchers on microcode development to enhance quantization for Ambarella's CVflow AI accelerators

Software Engineer Intern

Takes

Jan. 2026 – Jun. 2026

Remote

- Architected Next.js and React front end for Takes sports trivia, porting iOS features (Blitz, Fanplay) to a responsive web environment
- Integrated Google Cloud and Firebase Authentication to secure user data and maintain web-to-mobile synchronization
- Built CI/CD pipelines and configured Docker containerization to automate testing and deployment, supporting 150k events and more than 1,000 concurrent users

Tech Specialist and Co-Founder

One for the World - UW Madison

Dec. 2025 – Present

Madison, WI

- Develop and maintain the club's website using MongoDB, Express, React, and Node.js
- Organize shared drives, folders, and documentation to ensure easy access for executive members and facilitators
- Manage email lists, newsletters, and automated communication systems to keep members informed and engaged

PROJECTS

NeuroTrack

Mar. 2026 – Present

- Designed a novel walking tracker using low-power gyroscopes, Bluetooth modules, and a lightweight controller interface
- Built a companion mobile app with HTML, CSS, and JavaScript for data analytics and real-time tracking
- Won first place in the Digital Health Challenge, presenting to local founders and investors

UW Marketplace

- Built a student marketplace for UW-Madison to buy and sell textbooks, electronics, and tutoring in 24 hours at MadHacks
- Implemented Flutter and Dart for the UI, with a Serverpod backend using 2 endpoints and PostgreSQL

ACTIVITIES & LEADERSHIP

Wisconsin Autonomous

Hardware and Operations Member

Effective Altruism UW-Madison

Fellow

Charity Entrepreneurship

Co-Founder

AWARDS & HONORS

- Dean's List, Fall 2025 and 2026 -- University of Wisconsin - Madison
- First Place, Digital Health Challenge -- NeuroTrack project

SKILLS

Backend and Full-Stack: Node.js, Express, React, Next.js, Flask, MongoDB, PostgreSQL, Serverpod

Cloud and DevOps: Google Cloud, Firebase, Docker, CI/CD, Git/GitHub

Languages: Python, JavaScript, C/C++, Java, Dart, PHP, HTML, CSS

Other Tools: Flutter, Figma, Raspberry Pi 5, RPi.GPIO, Algorithm Design and Optimization, Embedded Systems
